AMERITECH'S

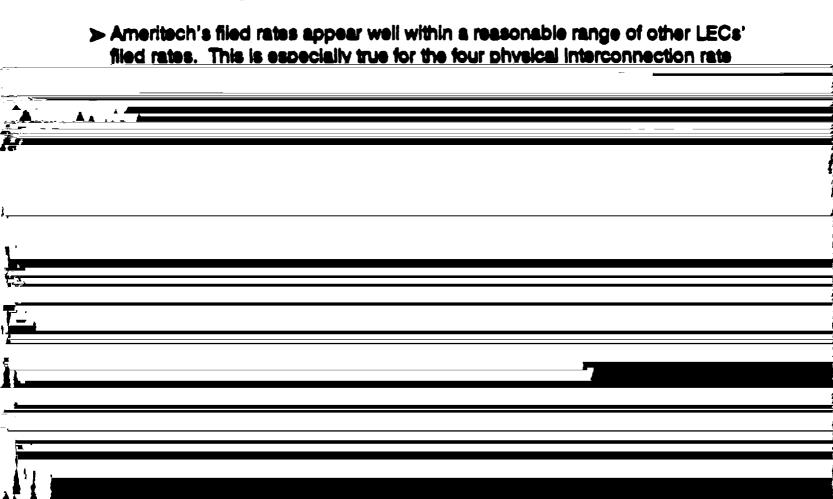

EXPANDED INTERCONNECTION and ZONE PRICING PLANS

AMERITECH Zone Pricing Plan

- ➤ Ameritech's Zone Pricing Plan should be approved immediately since interconnection Services are now available under tariff in the Ameritech region. The Commission's Order in Docket 91 141 recognized the relationship between the Special Access Expanded interconnection tariff becoming effective and the approval of Ameritech's Zone Pricing Plan.
- ➤ Ameritech's Density Zone Pricing Plan provides a limited degree of pricing flexibility enabling Ameritech to compete with Alternative Access Providers. Competitors may price on an individual case basis with no Commission review and no requirement to file cost. Competitors' claims that zone pricing will inhibit their ability to compete are an attempt to further use the regulatory process to delay true competition.
- ➤ Ameritech's Zone Pricing Plan meets all requirements as described in the Report and Order and Notice of Proposed Rulemaking in CC. Docket 91 – 141, released October 19, 1992 and the Order in the matter of Zone Density Pricing Plans, released June 18, 1993.
- ➤ Ameritech's plan contains one outstanding issue not addressed in the Order — density stated as Minutes of Use per Square Mile.
- Minutes of Use per Square Mile is an appropriate measure of density. The denominator of a density equation should be a definable unit (e.g., a square mile).
- > Zone Pricing must be approved. Competitive Access Providers already have operational expanded Virtual interconnection in the Ameritech region. CAPS are currently ordering Physical interconnection which will be operational shortly in the Ameritech region.

AMERITECH Expanded Interconnection Rates

- > Ameritech expects that interconnection rates which became effective subject to an investigation and Accounting Order will be found just and reasonable.
- ➤ Ameritech's Interconnection rates are reasonably compensatory in recovering Ameritech's cost of provisioning service. Rates were cost supported using standard cost procedures.
- ➤ LECs' cost of provisioning varies and it is inappropriate to expect all LECs to price the same.
- > A variety of rates and rate structures have been developed based upon each company's unique circumstances.
- This is reasonable.
- Direct comparisons do not necessarily reflect the reasonableness of individual company rates.
- > There is nothing wrong or unique with diversity in rates and rate structures.

Summary of An Analysis of Eight (8) Local Exchange Carriers ' interconnection Rates

- Based on Teleport Analysis presented in their Petition to Reject or Alternatively, Suspend and Investigate.
- Multiplication errors in Teleport's analysis have been corrected.
- Analysis does not include fiber pulling, splicing or testing.

 Some LECs have not tariffed these activities and the customer will contract to outside vendors. These are still activities that the customer must pay for but not to the LEC. In order to show comparisons, these activities were not included in this analysis.
- Analysis completed with filed rates prior to RAFs. Ameritech and the other LECs have not yet had the opportunity to defend their rates in the investigation.
- Range of physical interconnection rates per DS1 based on a demand of 100 DS1s.

High \$80.44 - Does not include construction charges (ICB)

Ameritech \$45,10

Low \$30.90

Excluding the high and low values the mean of the filed rates is:

- Using Teleport's methodology, Ameritech's price for one DS1 provisioned via multiplexed DS3 service: \$74.90 g
- Some LECs chose not to capitalize building modification investments.

 Although this would reduce costs, Ameritach believes building

AMERITECH Expanded Interconnection Rates

This is a summary of rates filed by the LECs for physical interconnection. These rates are further analyzed on the following pages.

	DS1 Cross Connect	Floor Space	Central Office Build Out	Ability to Connect one 7' Equip. Bay
Ameritech	\$13.97	\$787.96	\$46,900.55	\$16,549.13
Bell Atlantic	\$67.00	\$506.00	ICB	*
Bellsouth	\$ 9.00	\$931.00	\$51,660.00	*
GTE	\$ 3.77	\$816.00	\$48,919.00	*
NYNEX	\$ 6.43	\$533.00	\$54,900.00	*
Pacific	\$ 7.73	\$883.00	\$71,000.00	*
Southweste	ern \$ 7.22	\$157.00	\$71,488.00	*
US West	\$27.50	\$463.00	ICB	*

^{*} We believe that the Ability to Connect One 7' Equipment Bay to a Battery Distribution Fuse Board (BDFB) to be absolutely necessary. We are not able to ascertain where the cost of this equipment is recovered in other LECs' rates.

AMERITECH's DS1 Electrical Cross—Connection Rate is Reasonable

- 1 Ameritech included repeaters in the DS1 Cross Connect element
- 2 Repeaters are necessary to maintain the DS1 signal from the Transmission Node to Ameritech's equipment line up, due to distance limitations
- 3 Equipment included in Ameritech rates may be recovered elsewhere by other LECs' rates.

Ameritech

Electrical Cross-Connection Service

Ameritech DS1	Rate:	\$13.97
Investment Components:		
Jumper Cable/C Repeater	Connector	\$204.00 \$209.00
Monthly Direct Cost: Overhead Loading Factor:		\$ 8.84 1.58
	Rate:	\$13.97

The Repeater is necessary to maintain the DS1 signal integrity from the Transmission Node to the Cross-connect point.

Cross-Connect Comparisons:

1033-01	oninect companions.	items inci	uded (See Note)	Rate	
*	Ameritech	Jumper cabl	Jumper cable, termination, repeater		
*	Bell Atlantic	•	Jumper Cable and termination Repeaters, racks, cable		
*	Bellsouth	•	cable, terminal block, able rack, power	\$9.00	
	GTE	Frame and C	Frame and Cross-connect		
	NYNEX	DSX Termina	DSX Termination, cabling		
	Pacific	Not Stated		\$7.73	
	Southwestern	Jumper Cab	le only	\$7.22	
*	US West	Cabling, DS)	K panels, repeaters	\$27.50	
* Inc	cludes repeater				
		High:	\$ 67.00		
		Average:	\$ 17.83		
		Low:	\$ 3.77		

Average of companys which include the repeater:

Note: Each LEC uses their own terminology to describe equipment, some items may be the same although named differently.

\$29.37

AMERITECH's 100 Sq. Ft. of Floor Space Rate is Reasonable

- The Point Of Termination Bay (DSX) is necessary. It functions as an equal level signal point, a test access point and a clear demarcation point.
- 2 Floor Space rates are properly based on new construction costs.
- 3 Cost of Construction was obtained from the Means Building Construction Cost Data Guide, a widely accepted construction industry publication.

Ameritech

100 Sq. Ft. of Floor Space

	Ameritech	Rate:	\$787.96
	Investment Components:		
	Basic Floor Space Passive Bay Investment DS1 Termination Panel (.94 Weight) DS3 Termination Panel (.06 Weight) Panel Cabling Repeater Bay Repeater Panel		\$16,015.00 \$1,259.28 \$1,059.02 \$399.70 \$670.23 \$7,711.11 \$57.42

Southwestern	Floor Space Only		\$157.00
US West	Includes floor space, property taxes expenses and AC power	, operating \$ 278.00 -	\$463.00
(Based on Max. Floor Spa	High: \$931.00 ce rates) Average: \$634.62 Low: \$157.00)	

AMERITECH's Central Office Build Out Rate is Reasonable

- 1 It is appropriate ratemaking to state recurring capital cost on a net present value basis and recover through a nonrecurring rate element.
- 2 Costs for office modifications are shared. This rate was determined by averaging the cost of modifying a central office over anticipated number of Transmission Nodes within each office. This methodology recovers the cost of modifications from all Interconnection customers.

Ameritech

Central Office Build Out

	Ameritech	Rate:	\$46,900.55
	Investment Components	s :	
	Walls/Doors Locks and h A/C Outlet Heating,		\$4,318.08 \$3,527.68 \$290.16

Low:

\$46,900.55

AMERITECH'S Ability to Connect One 7' Equip. Bay to the DC Power Supply Rate is Reasonable

- 1 The Battery Distribution Fuse Board is an absolutely necessary piece of equipment.
- 2 Standard policies require each central office zone to have its own Battery Distribution Fuse Board for fire prevention. Interconnection Transmissior Nodes will be placed in a separate office zone.
- 3 The cost of the Battery Distribution Fuse Board has been allocated based on the expected number of equipment bays that the Interconnectors will place in the Transmission Nodes.
- 4 This Optional rate element does not apply to the first two (2) equipment bays placed in a Transmission Node.
- 5 Each equipment bay can accomodate approximately 392 DS1s.

Ameritech

Ability to Connect One 7' Equipment Bay

Ability to Connect One 7' Equip. Bay Rate: \$16,549.13

Investment:

Battery Distribution Fuse Panel/Bay Connected \$8,107.00 Maintenance, Depreciation, Taxes \$2,367.13

Direct Cost: \$10,474.13 Overhead Loading Factor: 1.58

Rate: \$16,549.13

This capability was unbundled as a separate rate element to facilitate interconnector's control over the costs they incur.
